Curriculum Changes

Curriculum changes may affect current and returning students. If a change occurs an alternate plan of study may be established for students to complete in lieu of the original requirements.

DeVry University reserves the right to change graduation requirements and to revise, add, or delete courses.

Program Changes

Students planning to transfer from one program to another at the same DeVry University location must apply to do so with the Associate Dean of the new program prior to the close of registration. These students may be required to sign an enrollment agreement addendum before beginning classes in the new program.

Please note: Not all completed coursework may transfer.
